

Kevin Todd – Candidate for TCM Equipment Curator

Hey everyone!

I'm running because I want to fix equipment issues from the inside; by getting my hands dirty rather than just complaining about the lack of support received by myself and many of my peers here at Trinity. The Equipment team is undersupplied and undervalued by its current members, and this needs to change.

Equipment Curator is a job that requires knowledge, experience, and a commitment to your college to provide a service you love.

Which is why it's strange that for several events this year, (including Conversat Coffeehouse and Quad Coffeehouse), the designated equipment person either didn't show up or had never done tech before, and I was asked to step in last minute!

Don't get me wrong, this is something I love doing. I'm not running to fill a spot on my resume; I'm not running for the honorarium provided; *HELL, I'd do this job for free and spend the money on equipment for the college if I could!* I'm running because I love doing tech and because I have experience in this area:

- I have performed at several events around the University and have assisted with tech at the majority of these events voluntarily
- I was Performance Relations Manager and MC for TEDxUofT 2017: OPEN, which was nominated for Unity Ball's *Event of the Year*
- I have built my own home studio and have been recording acts for over 4 years

Let's make tech great again!

Thanks,

Kevin Todd
